

PENDU CRANE MAT SYSTEM

THE RELIABILITY YOU DEMAND WITH THE PERFORMANCE YOU NEED

Build crane mats quickly and efficiently with a Pendu Crane Mat System! The core of this system is our 1400 drill station, which simultaneously bores all of the holes needed to assemble a crane mat. The system then flips the timber and sends it to the assembly station, where the crane mat is completed. The system also includes an unscrambler on the infeed side to get timber moving efficiently into the drill station.

Crane Mat System Specifications

7500 PIT UNSCRAMBLER

Material	Length - 8' to 20'
Cant Sizes	6" x 8", 8" x 8", 8" x 10", 8" x 12" & 12" x 12"

1400 DRILL STATION SPECS

Length	20' w/ powered rollcase
Material	Length - 8' to 20', width - 8" to 12", height - 8" to 12"
Drill Units	10hp TEFC motors
Horizontal Travel	14"
Drill Bits Per Unit	1
Bottom Waste Removal Auger	Standard
