The 7500 fully automated Pit Unscrambler is one of the most efficient systems available today. Designed and built for rugged reliability and performance, the 7500 accepts raw materials on a 3-strand infeed deck, then conveys it to the pit. There, the automatic system continuously delivers the sorted material to the powered infeed roll system. The 7500 features two 3 HP electric gear drive motors, heavy-duty steel construction and can handle randomly sized cants.

Smooth, efficient operation.

Specifications
- Material Capacity: 6’ - 18’ Lengths
- Infeed Deck: 12’ (3) Strand Green Chain Forward/Reverse
- Upset Sprocket on ea. Strand
- Handles (1) 4’ Bunk Before Upset Sprocket
- Bearing Guard at End of Center Rail: 3/4” Plate Steel
- Pit: 3/8” Plate
- Automatic Refill

Options
- Additional Strand
- Hydrauic Drive
- (2) Strand 36” Wide
- Pit & Outfeed Only (4) Strand
- Pit & Outfeed Only (3) Strand
- Pit & Outfeed Only (2) Strand

Heavy-duty steel and tough green chain combine to stand up to tough abuse, day after day.
